**Reviewed 1H 2019 Consolidated Results Announcement**

Wah Lee's 1H 2019 sales reached NT\$26,107 million, a 4.23% YoY increase from the same period of 2018.

- **Information Communication Technology 6.80% YoY decline:** ICT materials 1H19 sales, including Engineering Plastics and PCB materials, reached NT\$10,570 million. Despite the noises in macro economy, Wah Lee's ICT sector still posted a strong 19.3% QoQ growth in 2Q19 sales vs. 1Q19. This sector expects to see continuously good performance in the traditional peak season in 3Q.
- **Semiconductor 2.08% YoY decrease:** It is consistent with previous industry consensus that 1Q19 would be the trough season for semi industry in this year. 2Q19 sales posted a nice pick up of 10.2% QoQ growth for Wah Lee's semiconductor sector. Wah Lee has expanded its business in the Chinese semiconductor industry and will enjoy the uprising trend among its successful Taiwanese and Chinese semicon customers. Semi 1H19 sales reached NT\$5,062M.
- **FPD 37.27% YoY increase:** FPD sales reached NT\$8,023M for 1H19 and continued its growth. Next generation electronic products (including TV mainboards and very large screen LCD TV with touch panel module for educational/commercial purposes) led the sector's growth momentum.
- **Green Energy 24.59% YoY decline:** Green Energy 1H19 sales reached NT\$1,231M. Wah Lee will put more emphasis on Taiwan government's goal to achieve 20 gigawatts from solar power before 2025 and attain related business opportunities.

**1H2019 EPS was NT\$2.85, 11.5% growth from 1H18**

Consolidated 1H2019 gross profit was NT\$1,999M, a 7.9% decrease, compared to NT\$2,170M in 1H2018. 1H19 gross margin was 7.7%, as compared to 8.7% in 1H18, due to product mix changes. Operating expense ratio was maintained at 4.8% and operating profit was NT\$752M. Overall non-operating profit was NT\$172M, with steady profit contributions from long-term investment companies. 1H19 pretax profit totaled NT\$924M. After tax profit for 1H19 was NT\$659M, as compared to NT\$592M in 1H18 and posted an 11.5% growth. 1H19 EPS was NT\$2.85/share, as compared to NT\$2.56/share for 1H18.

## 2019 Outlook

Wah Lee is well diversified among different industries and various customers and is constantly staying ahead of the latest development in product applications and technology trends. High-end engineering plastics enjoys its leading position in the industry as there are growing demands for optical grade plastics for lenses used in camera modules on smartphones and automobiles with autopilot and ADAS functions. More and more high-end plastics are also used in auto parts to replace metals for weight-reducing and more environmental endurance. Wah Lee's PCB sector is leading in the provision of 5G materials, which is expected to start commercial production beginning in this year. Wah Lee provides low dk, high frequency PCB materials that fit the requirements of 5G antenna and other communication devices. Semiconductor industry gradually returned to growth starting from Q2 and will still show an overall growth for the whole year. Wah Lee's semicon sector will grow in line with the industry as it is dominant in providing one-stop-shopping services for chemicals and other consumables to its clients in the industry. FPD is aggressively expanding its product portfolio and geographic coverage to meet customer demands in mainland China, US, EU and emerging markets. It now not only provides upstream materials for FPD industry but also sells semi-finished modules and finished products such as interactive touch panel TVs. Green Energy sector will have growth potential for it is integrating the supply chain from upstream materials to downstream solar modules and building solar power plants with Taiwanese government's supports. It is also penetrating into the ESS (Energy Storage System) market to provide energy-saving solutions for factories and enterprises. We team up with the largest telecom carrier in Taiwan to provide a total solution platform. With the above endeavors to keep expanding our business scopes, we are conservatively optimistic to see another growth year for 2019.
