FY2021 Consolidated Results Announcement

Wah Lee's FY21 sales reached NT\$70,515 million, a 19.4% YoY increase and a record high annual sales in company history.

- Information Communication Technology 13.35% YoY increase: ICT materials full year 2021 sales reached NT\$30,144 million. Continuously growing demands for our high-end engineering plastics and PCB materials are further boosted by the new generation of server platforms launched by Intel and AMD. CPU and DDR5 DRAM sockets under the new PCIe standard are just some of the various applications of our plastic resins. New servers also require 18-20 layered PCBs that utilize our high resolution dry film and CCL.
- Semiconductor 15.62% YoY increase: FY21 Semi sales was NT\$14,025 million. IC chips are essential in the modern world and their volumes are destined to increase exponentially. EVs, for example, are basically 3C products on the move and are composed of countless chips. Wah Lee is a total solution provider of specialty chemicals and gases for semi customers in Taiwan, China, and Singapore and will expand its supply to other overseas sites.
- FPD 31.78% YoY growth: FY21 FPD sales reached NT\$21,413M and grew more than 30%. The next generation electronic product (electronic whiteboard) was in great demand as US schools re-opened and got a great deal of subsidies from the government to upgrade classroom equipment and interactive learning device. Corporate activities also resumed and purchased more interactive meeting equipment and display products.
- Green Energy 15.58% YoY increase: Green Energy FY21 sales reached NT\$1,896M. Lithium battery material sales grew substantially as Wah Lee supplied cathode and anode materials to both Taiwanese and Chinese Li-battery manufacturers. With 54MW of solar power capacity by yearend 2021 and more to come in 1~2 years, Wah Lee will be able to provide customers with carbon rights and strengthen its total solution provider position under the ESG requirements.

FY2021 EPS was NT\$12.05 and cash dividend is NT\$6.8/share

FY21 consolidated sales of NT\$70,515M set a record high. Consolidated 2021 gross profit was NT\$5,983M, a 24.6% increase compared to NT\$4,801M a year ago. FY21 gross margin was 8.5%, as compared to 8.1% in 2020, due to better gross margins across all sectors as a result of price increase. Operating expense ratio lowered to 4.13% and operating margin improved to 4.36% (vs. 3.57% a year ago). Operating profit was NT\$3,073M, grew by 45.8%. Non-operating profit was NT\$943M, mainly contributed from steady profits recognized from long-term investment companies, such as CWE(8070.TT). Pretax profit totaled NT\$4,016M. FY21 after tax and minority profit was NT\$2,843M, as compared to NT\$1,859M in 2020 and posted a 52.9% growth. FY21 EPS was NT\$12.05 and cash dividend of NT\$6.8 was approved by the Board.

2022 Outlook

Despite recent turbulences from geo-political conflicts and interest rate hikes as a result of inflations, our views on the mega trends of fundamental technology industries remained intact. 5G, EV, AI, AIoT, HPC(high performance computing), data center, and cloud computing will continue to develop, whether in a slower pace or faster. Critical raw materials for the above-mentioned mega trends are actually getting more important for manufacturers to secure the supplies. Wah Lee's role in the overall supply chain has become more crucial. Products that Wah Lee supplies are summarized as below:

Wah Lee has been providing thermoset plastics (e.g. phenolic and PA9T) which are of high rigidity, high reliability, and high insulation capability. These plastics have been the first choice for major power supply manufacturers and have also penetrated into the applications of auto parts, EV electrical components, and EV charging stations. Moreover, optical grade plastics generate strong sales as more lenses and camera modules are used in smartphones and automobile ADAS systems. PCB sector is leading in the provision of materials for 5G networks and IC substrate makers, which require high frequency, low Dk, low Df CCL substrates and high-resolution dry films for high precision circuitry. With the great demands from 5G and EVs and the additional IC fab capacity expansions, more semiconductor raw materials are in needs. Wah Lee, as the top supplier for the world leading foundry company, has strong sales of photoresists, electronics grade chemicals, specialty gases, photoresist strippers, and CMP slurry driven by the strong industry demands. Wah Lee has become the largest supplier of semiconductor front end manufacturing process consumable raw materials. FPD sales is also expected to grow because more on-line activities and the e-commerce promote the demands for large-screen LCD TVs and video conferencing displays. The schools also require a lot more of Wah Lee's next generation electronic products. Wah Lee's endeavors in the Green Energy sector will also pay off as suppliers and customers alike will need carbon rights for business continuities. Wah Lee's solar power capacities will provide the solutions and the ESS (Energy Storage System) business will serve as the last mile for the transition to the alternative energies.
